2 Details of the Offer

2.1 Background and Nature of our Business

The Issuer is Hill End Gold Limited (ACN 072 692 365).

Hill End Gold is an Australian exploration and development company that has the goal of becoming a mid-tier producer based on its projects at Hargraves and Hill End and with the acquisition of and investment in additional high potential projects.

2.2 The Rights Issue Offer

Pursuant to this Offer Document, the Company is making a renounceable, pro-rata offer to each Eligible Shareholder of New Shares at an issue price of 0.3 cents (\$0.003) per New Share on the basis of one (1) New Share for every two (2) Shares held on the Record Date (“Rights Issue Offer” or “Offer”).

The New Shares will be issued as fully paid and will rank equally in all respects with existing Shares on issue. Refer to Section 5.1 for a summary of the rights attaching to the New Shares.

At the date of this document the Company has:

- 1,220,704,897 Shares on issue;
- 37,500,000 Options on issue;

Up to 610,352,448 New Shares will be issued under the Offer subject to variations caused by fractional rounding discussed below.

Where the determination of the Entitlement of any Eligible Shareholder results in a fraction of a New Share, such fraction will be rounded up to the nearest whole New Share.

If fully subscribed, the Offer will raise up to \$1,831,057 before costs and expenses. See Section 3.1 for details on the Company’s proposed use of the proceeds raised.

The Directors of the Company make the following comments regarding the price per New Share under the Offer:

- Hill End Gold’s last placement was an issue on 24 March 2015 at \$0.005 per Share.
- Having regard to the current investment market, the relative value of HEG shares over the past year and the outlook for the company, the Board has decided that \$0.003 per Share is a reasonable price for the Offer.
- The Board having considered the Company’s working capital requirements and the Company’s future strategy as described in this Offer Document are of the opinion that the ratio of the Rights Issue Offer is appropriate.

2.3 The Shortfall Offer

This Offer Document also contains an offer to issue New Shares under the Shortfall Offer to all Eligible Shareholders and other eligible investors. The offer of New Shares under the Shortfall Offer is a separate offer pursuant to this Offer Document and is independent from the Rights Issue and will remain open after the Rights Issue has closed to the extent permitted by the ASX Listing Rules.

New Shares not accepted by Eligible Shareholders under the Rights Issue Offer will form the “Shortfall Shares”.

Shareholders may, in addition to their Entitlement, apply for Shortfall Shares under the Shortfall Offer.

The issue price of the Shortfall Shares is 0.3 cents (\$0.003) per Shortfall Share, being the price of the Rights Issue Offer.

If you wish to apply for Shortfall Shares, you must specify the number of Shortfall Shares for which you wish to apply on the Entitlement and Acceptance Form in accordance with the instructions on that form. You must also provide Application Money to cover the issue price for all of the Shortfall Shares for which you are applying.

The Directors will issue Shortfall Shares subject to any restrictions imposed by the Corporations Act and as follows:

- Shortfall Shares will first be allocated to all Eligible Shareholders who have accepted their Entitlement in full and applied for additional Shortfall Shares; and
- any remaining Shortfall Shares will then be allocated to other investors who have applied for Shortfall Shares,

("Shortfall Offer Order").

Shortfall Shares will only be issued under the Shortfall Offer if the Rights Issue Offer is undersubscribed and will only be issued to the extent necessary to make up any shortfall in subscriptions. If the Company receives applications for Shortfall Shares that would result in the Rights Issue Offer being oversubscribed, then the Company will scale back applications for Shortfall Shares (subject to the Shortfall Offer Order). Accordingly, there is no guarantee that you will receive the Shortfall Shares you apply for in excess of your Entitlement.

If the scale back results in fractions of Shortfall Shares, any such fractions will be rounded up to the nearest whole New Share.

Accordingly, the Board reserves the right to allot to an Applicant for Shortfall Shares a lesser number of Shortfall Shares than the number for which the Applicant applies, or to reject an application, or to not proceed with placing the Shortfall Shares. If you do not receive all of the Shortfall Shares you applied for, the excess Application Money will be returned to you without interest.

Shortfall Shares under the Shortfall Offer will, as far as practicable, be issued at the same time as the issue of New Shares under the Offer or within three months after the Closing Date. The Company will not issue Shortfall Shares where it is aware that to do so would result in a breach of the Corporations Act, the Listing Rules or any other relevant legislation or law. Eligible Shareholders wishing to apply for Shortfall Shares must consider whether the issue of the Shortfall Shares applied for would breach the Corporations Act or the Listing Rules having regard to their own circumstances.

The Directors reserve the right to reject any application for Shortfall Shares or to allot a lesser number of Shortfall Shares than applied for. Application monies received but not applied towards subscriptions for Shortfall Shares will be refunded as soon as practicable. No interest will be paid on application monies held and returned.

To the extent any Shortfall remains after allocation to Eligible Shareholders who have applied for the Shortfall Shares, the Company will use its best endeavours to place those remaining Shortfall Shares.

No related party of the Company (including Directors and their Associates) is permitted to participate in the placement of any Shortfall Shares.

2.4 Ineligible Shareholders

The Company has decided that it is unreasonable to make the Offer to any Shareholder with a registered address outside Australia or New Zealand at the Record Date having regard to the cost to the Company of complying with applicable legal and regulatory requirements outside Australia and New Zealand.

Accordingly the Offer is not being extended to Shareholders with a registered address outside Australia or New Zealand. In accordance with Listing Rule 7.7.1(b) the Company will send each holder to whom it will not offer New Shares, details of the Rights Issue and an advice that the Company will not offer New Shares to those holders.

2.5 Rights Issue exception not available

No nominee has been appointed for Ineligible Shareholders under section 615 of the Corporations Act, which has the effect of not making the Offer to every Shareholder and, as such, Eligible Shareholders will not be able to rely on

the exception for rights issues in item 10 of section 611 of the Corporations Act. Accordingly, when an Eligible Shareholder applies for some or all of its Entitlement, it must have regard to the takeovers prohibition in section 606 of the Corporations Act (that is, the 20% voting power threshold). Eligible Shareholders who may be at risk of their voting power in the Company increasing beyond that allowed by the takeovers prohibition in section 606 of the Corporations Act as a result of the acceptance of the Offer should seek professional advice before completing and returning the Entitlement and Acceptance Form.

2.6 Purpose of the Offer

The purpose of the Offer is to raise funds for exploration and pre-development activities on the Company's projects and for the acquisition of or investment in significant resource opportunities (see Section 3.1).

2.7 Opening and Closing Dates

The Company will accept Entitlement and Acceptance Forms after the Opening Date until 5:00 pm (Sydney time) on the Closing Date, or such other date as the Directors in their absolute discretion shall determine.

2.8 No Minimum Subscription and No Underwriting

There is no minimum subscription for the Offer.

The Offer is not underwritten.

2.9 How to apply for New Shares

Payment of Application Monies (Application Monies must be equal to the Offer Price multiplied by the total number of New Shares applied for including Shortfall Shares) will only be accepted in Australian currency – note that cash payments will not be accepted, as follows:

a) By Cheque

Cheques should be made in Australian currency and made payable to "**Hill End Gold Limited**" and crossed "**Not Negotiable**".

A completed Application Form must be accompanied by a cheque for the Application Money and lodged in person or by post with the Company at the following address:

Boardroom Pty Limited

Level 12,
225 George Street
Sydney NSW 2000
AUSTRALIA

or, GPO Box 3993
Sydney NSW 2001

A reply paid envelope is enclosed for your convenience. If mailed in Australia no postage stamp is required.

Applications must be received by 5:00 p.m. (Sydney time) on the Closing Date (subject to the right of the Directors to close the Offer earlier or extend the Closing Date without notice).

Your acceptance of the Offer must be made on the Application Form accompanying this Offer Document. An Eligible Shareholder may participate in the Offer as follows:

- i) **if you wish to accept your Entitlement in full and apply for additional New Shares:** complete the Application Form, filling in the details in the spaces provided on the Application Form (including the number of Shortfall Shares you wish to apply for) and attach your cheque for the appropriate Application Monies (at \$0.003 per Share) including the amount for the Shortfall Shares being applied for; or

In the calculation of an Application and the number of the New Shares to be issued, fractions will be rounded up to the nearest whole number.

Acceptance of a completed Entitlement and Acceptance Form or BPAY® payment by the Company creates a legally binding contract between the Applicant and the Company for accepted securities.

If the Entitlement and Acceptance Form is not completed correctly it may still be treated as valid. The Directors'

decision as to whether to treat the acceptance of an Entitlement and Acceptance Form as valid and how to construe, amend or complete the Entitlement and Acceptance Form, is final.

2.10 Allotment of New Shares

The Company will proceed to allocate New Shares as soon as possible after the Closing Date. The Company reserves the right to allocate to any Applicant a lesser number of New Shares than that applied for, or to decline any Application. Where no allocation is made to a particular Applicant or the number of New Shares allocated is less than the number applied for by an Applicant, surplus Application Monies will be returned to that Applicant within 30 days of the Closing Date. No interest will be paid on refunded Application Monies.

Successful Applicants will be notified in writing of the number of New Shares allocated to them as soon as possible following the allocation being made after the Closing Date. It is the responsibility of Applicants to confirm the number of New Shares allocated to them prior to trading in the New Shares. Applicants who sell their Shares before they receive notice of the number of New Shares allocated to them do so at their own risk.

No New Shares will be allotted or issued on the basis of this Offer Document later than 13 months after the date of issue of this Offer Document.

2.11 Application Money Held on Trust

All Application Monies received for the New Shares will be held in trust in a bank account maintained solely for the purpose of depositing Application Monies received pursuant to this Offer Document until the New Shares are issued. All Application Monies will be returned (without interest) if the New Shares are not issued.

2.12 ASX Quotation

The Company will make an application to the ASX within seven days of the date of this Offer Document for official quotation of the New Shares.

If approval is not granted by the ASX for the official quotation of the New Shares, within three months after the date of this Offer Document (or such other period as the ASX may allow), the Company will repay, within the time prescribed by the Corporations Act, all Application Monies received pursuant to this Offer Document, without interest.

2.13 CHESS and Issuer Sponsorship

The Company operates an electronic CHESS sub-register and an electronic Issuer Sponsored sub-register. These two sub-registers make up the Company's register of securities.

Under CHESS, Applicants will not receive a certificate but will receive a statement of their holding of securities as soon as practicable after allotment.

If you are broker sponsored, you will receive a CHESS statement. The CHESS statement will set out the number of New Shares issued under this Offer Document, provide details of your holder identification number, the participant identification number of the sponsor and the terms and conditions applicable to the New Shares.

If you are registered on the Issuer Sponsored subregister, you will receive an Issuer Sponsored statement. Your Issuer Sponsored statement will contain the number of New Shares issued to you under this Offer Document and your security holder reference number.

A CHESS statement or Issuer Sponsored statement will routinely be sent to Shareholders at the end of any calendar month during which the balance of their shareholding changes. Shareholders may request a statement at any other time; however, a charge may be made for additional statements.

2.14 Overseas Shareholders

The Offer is an offer to Eligible Shareholders only, being those Shareholders with registered addresses in Australia or New Zealand. It does not constitute an offer in any place in which, or to any person to whom, it would not be lawful to make such an offer.

The Offer contained in this Offer Document to Eligible Shareholders with registered addresses in New Zealand is made in reliance on the Securities Act (Overseas Companies) Exemption Notice 2013 (New Zealand). Members of the public in New Zealand who are not existing Shareholders on the Record Date (as defined in the timetable) are not entitled to apply for any New Shares.

2.15 Risk Factors

An investment in New Shares should be regarded as speculative. In addition to the general risks applicable to all investments in listed securities, there are specific risks associated with an investment in the Company which are detailed in Section 4.

Shareholders should carefully read the "Risk Factors" in Section 4 before deciding to participate in the Offer.

2.16 Taxation Implications

The Directors do not consider it appropriate to give investors advice regarding the taxation consequences of subscribing for New Shares under this Offer Document.

The Company, its advisers and its officers do not accept any responsibility or liability for any such taxation consequences to investors. Investors should consult their professional tax adviser in connection with subscribing for New Shares under this Offer Document.

3 Purpose and effect of the Offer on the Company

3.1 Use of Funds

The funds raised under the Offer may be used primarily:

- To bring the Hargraves and Red Hill Gold Projects to a pre-development permitted status;
- To further explore our tenements where a reasonable chance of resource extension or addition is anticipated;

Hill End Gold's business strategy is focused on creating value for Shareholders through the advancement of its exploration and pre-development projects, principally the wholly owned Hargraves Project and the Hill End Project, and through acquisition of, or investment in direct and indirect interests in other attractive gold projects.

3.3 Effect on Control

If all Entitlements are taken up, the Offer will have no effect on the control of the Company. However, should only some of the Entitlements be taken up under the Offer, the shareholding of Shareholders who do not take up their Entitlements, or only take up part of their part of their Entitlements, will be diluted.

Ineligible Shareholders will have their holdings diluted by the Offer. The extent of any dilution will depend on the level of participation in the Offer.

It is not possible for the Directors to predict the final level of participation and Shortfall under the Offer, or the identity of Eligible Shareholders who will subscribe for their Entitlements. The Directors are also unable to state with certainty the identity of any prospective subscribers under the Shortfall Offer, or the total number of Shortfall Shares which will or can be placed.

The potential effect of the Offer on the control of the Company is as follows:

- If all Eligible Shareholders take up their full Entitlements, there would be no significant effect on the control of the Company, as the Offer is made pro-rata and in that case no Entitlements would lapse or revert to the Shortfall.
- If Eligible Shareholders do not take up their full Entitlements under the Offer, then the interests of those Eligible Shareholders will be diluted.
- The proportional interests of Ineligible Shareholders will be diluted because those Ineligible Shareholders are not entitled to participate in the Offer.

No nominee has been appointed for Ineligible Shareholders under section 615 of the Corporations Act, which has the effect of not making the Offer to every Shareholder and, as such, Eligible Shareholders will not be able to rely on the exception for rights issues in item 10 of section 611 of the Corporations Act. Accordingly, when an Eligible Shareholder applies for some or all of its Entitlement, it must have regard to the takeovers prohibition in section 606 of the Corporations Act (that is, the 20% voting power threshold). Eligible Shareholders who may be at risk of their voting power in the Company increasing beyond that allowed by the takeovers prohibition in section 606 of the Corporations Act as a result of the acceptance of the Offer should seek professional advice before completing and returning the Entitlement and Acceptance Form.

Any Shortfall will be issued by the Company on the basis that no person will be issued Shortfall Shares if such issue will result in their voting power in the Company increasing beyond that allowed by the takeovers prohibition in section 606 of the Corporations Act.

4 Risk Factors

The New Shares offered under this Offer Document should be considered speculative because of the nature of the Company's business.

Activities in the Company, as in any business, are subject to risks, which may impact on the Company's future performance. The Company has implemented appropriate strategies, actions, systems and safeguards for known risks however some are outside its control.

The Directors consider that the following summary, which is not exhaustive, represents some of the major risk factors which investors need to be aware of in evaluating the Company's business and risks of increasing your investment in the Company.

Investors should carefully consider the following factors in addition to the other information presented in this Offer Document and consult their professional advisers before deciding whether to apply for the New Shares pursuant to this Offer Document.

The principal risks include, but are not limited to, the following:

4.1 Specific Risks associated with the Offer

(a) Large number of New Shares

Upon implementation of the Offer, if all Entitlements are taken up the number of Shares in the Company will increase from 1,220,704,897 currently on issue to 1,831,057,345 (one and a half times its current issued share capital). This means that each Share will represent a significantly lower proportion of the ownership of the Company.

(b) Dilution

The interests of Eligible Shareholders who do not participate in the Rights Issue in full and Ineligible Shareholders will be diluted as a result of the Company undertaking the Rights Issue.

4.2 Specific risks associated with the Company

(a) Operating Risks of the Company

The prospects of the Company must be considered in light of the considerable risks, expenses and difficulties frequently encountered by companies in a similar stage of resource exploration and development activities as the Company.

The amounts and timing of expenditures will depend on the progress of ongoing exploration and development, the results of consultants' analyses and recommendations, the rate at which operating losses are incurred, the execution of any joint venture agreements with strategic partners, and other factors, many of which are beyond the Company's control.

The Company expects to incur losses unless and until such time as any new or current projects enter into commercial production and generate sufficient revenues to fund their continuing operations. The development of the new and current projects will require the commitment of substantial resources.

There can be no assurance that the Company will generate any revenues or achieve profitability.

(b) Reliance on Key Personnel

The resources business in which the Company is involved is reliant upon a number of directors and key management personnel. The loss of any of these personnel could have a material adverse impact on the business of the Company.

(c) Additional Requirements for Funding

The Company's funding requirements depend on numerous factors including the Company's ability to generate income from its projects, the results of joint venture operations, future exploration and work programs and the acquisition of new projects. It may require further funding in addition to current cash reserves to fund exploration and development activities.

Additional equity financing, if available, may be dilutive to Shareholders and at lower prices than the current market price. Debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations or anticipated expansion.

(d) Markets

The marketability of the Company's production depends in part upon the availability, proximity and capacity of infrastructure such as ports, railways, pipelines and processing facilities.

Federal and state regulation of resources production and transportation, tax and energy policies, changes in supply and demand and general economic conditions could all adversely affect the ability to produce and market mineral commodities.

(e) Service Capacity

Exploration and development activities may be undertaken in locations that have limited or no spare service capacity. There may be delays in securing equipment and personnel required to carry out the Company's planned activities.

Due to the demand for equipment and personnel there may also be upward pressure on costs and mechanical failure may result in delays.

Any of these factors may result in cost and time overruns which may have a material impact on the Company's profitability and cash flows.

(f) Title to Tenements

The Company cannot guarantee that those tenements in which it has an interest and which are still in the application stage or require transfer will ultimately be granted or transferred in whole or in part pursuant to the applicable legislation. There is also no guarantee that the tenements will be granted or transferred without undue delay or that the Company can economically comply with any conditions imposed on any granted exploration permits.

The Company has an interest in applications for tenements that have been applied for but not granted. In order for these tenements to be granted the Company must satisfy any relevant mining legislation.

There is no guarantee that the tenements will be granted to the relevant parties, that they will be granted without undue delay, that the tenements will be transferred to the Company (when applicable) and the holder can comply with any conditions imposed on or granted exploration permits.

The Company's mining exploration activities are dependent upon the maintenance (including renewal) of its tenements. Although the Company has no reason to think that these tenements will not be renewed, there is no assurance that such renewals will be given as a matter of course and there is no assurance that new conditions will be imposed.

4.3 Mineral Industry Risks

(a) Exploration and development risks

The exploration for, and development of, mineral deposits involves a high degree of risk. Few properties which are explored are ultimately developed into producing mines. Resource exploration and development is a speculative business, characterised by a number of significant risks, including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits, but also from finding mineral deposits that, although present, are insufficient in quantity and quality to return a profit from production.

The marketability of minerals acquired or discovered by the Company may be affected by numerous factors that are beyond the control of the Company and that cannot be accurately predicted, such as market fluctuations, the proximity and capacity of milling facilities, mineral markets and processing equipment, and such other factors as government regulations, including regulations relating to royalties, allowable production, importing and exporting of minerals, and environmental protection, the combination of which factors may result in the Company not receiving an adequate return on investment capital.

Whether a mineral deposit will be commercially viable depends on a number of factors, which include, without limitation, the particular attributes of the deposit, such as size, grade and proximity to infrastructure, metal prices, which fluctuate widely, and government regulations, including, without

limitation, regulations relating to prices, taxes, royalties, land tenure, land use, importing and exporting of minerals and environmental protection. The combination of these factors may result in the Company expending significant resources (financial and otherwise) on a property without receiving a return. There is no certainty that expenditures made by the Company towards the search and evaluation of mineral deposits will result in discoveries of an economically viable mineral deposit.

The Company has relied on and may continue to rely on consultants and others for mineral exploration and exploitation expertise. The Company believes that those consultants and others are competent and that they have carried out their work in accordance with internationally recognized industry standards. However, if the work conducted by those consultants or others is ultimately found to be incorrect or inadequate in any material respect, the Company may experience delays or increased costs in developing its properties.

(b) Resource estimates

Ore Reserve and Mineral Resource estimates are expressions of judgment based on drilling results, past experience with mining properties, knowledge, experience, industry practice and many other factors. Estimates which are valid when made may change substantially when new information becomes available. Ore estimation is an interpretive process based on available data and interpretations and thus estimations may prove to be inaccurate.

The actual quality and characteristics of ore deposits cannot be known until mining takes place, and will almost always differ from the assumptions used to develop resources. Further, Ore Reserves are valued based on future costs and future prices and consequently, the actual Ore Reserves and Mineral Resources may differ from those estimated, which may result in either a positive or negative effect on operations.

(c) Payment obligations

Under the exploration permits and licences and certain other contractual agreements to which the Company is or may in the future become party, the Company is or may become subject to payment and other obligations. In particular, the permit holders are required to expend the funds necessary to meet the minimum work commitments attaching to the permits and licences. Failure to meet these work commitments will render the permit liable to be cancelled.

Further, if any contractual obligations are not complied with when due, in addition to any other remedies which may be available to other parties, this could result in dilution or forfeiture of interests held by the Company.

(d) Operating risks

The operations of the Company may be affected by various factors including failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration or mining, operational and technical difficulties encountered in mining, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment, fire, explosions and other incidents beyond the control of the Company.

These risks and hazards could also result in damage to, or destruction of, production facilities, personal injury, environmental damage, business interruption, monetary losses and possible legal liability. While the Company currently intends to maintain insurance within ranges of coverage consistent with industry practice, no assurance can be given that the Company will be able to obtain such insurance coverage at reasonable rates (or at all), or that any coverage it obtains will be adequate and available to cover any such claims.

The Company's projects are subject to laws and regulations regarding environmental, mining and exploration activities. The effective and expeditious undertaking of such activities depend on obtaining timely consents and approvals for the activities and for access to the properties on which the Company operates. These activities would be expected to have a variety of environmental and social impacts and community expectations need to be closely considered to implement changes as appropriate to mitigate these impacts. Such measures may adversely modify the conduct and value of the Company's activities.

(e) Commodity price volatility

Metal prices fluctuate and are affected by numerous factors beyond the control of the Company.

These factors include world demand for minerals and metals, forward selling by producers, and production cost levels in major mineral-producing regions.

Moreover, commodity prices are also affected by macroeconomic factors such as expectations regarding inflation, interest rates and global and regional demand for, and supply of, the metal as well as general global economic conditions. These factors may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.

(f) Insurances

Insurance of all risks associated with exploration and production is not always available and, where it is available, the cost may be high. The business of the Company is subject to a number of risks and hazards generally, including adverse environmental conditions, industrial accidents, labour disputes, unusual or unexpected geological conditions, ground or slope failures, cave-ins, changes in the regulatory environment and natural phenomena such as inclement weather conditions, floods and earthquakes. Such occurrences could result in damage to mineral properties or production facilities, personal injury or death, environmental damage to properties of the Company or others, delays in mining, monetary losses and possible legal liability.

Although the Company maintains insurance to protect against certain risks in such amounts as it considers to be reasonable, its insurance will not cover all the potential risks associated with its operations and insurance coverage may not continue to be available or may not be adequate to cover any resulting liability, particularly as the Company is seeking to acquire new projects which are located in other jurisdictions or involve a new commodity.

It is not always possible to obtain insurance against all such risks and the Company may decide not to insure against certain risks because of high premiums or other reasons. Moreover, insurance against risks such as environmental pollution or other hazards as a result of exploration and production is not generally available to the Company or to other companies in the mining industry on acceptable terms.

Losses from these events may cause the Company to incur significant costs that could have a material adverse effect upon its financial performance and results of operations.

(g) Environmental risks

The operations and activities of the Company are subject to regulations concerning the environment.

The Government and other authorities that administer and enforce environmental laws determine these requirements. As with all exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if mine development proceeds. The Company intends to conduct its activities in an environmentally responsible manner and in accordance with applicable laws.

The cost and complexity of complying with the applicable environmental laws and regulations may prevent the Company from being able to develop potentially economically viable mineral deposits.

Although the Company believes that it is in compliance in all material respects with all applicable environmental laws and regulations, there are certain risks inherent to its activities, such as accidents or other unforeseen circumstances, which could subject the Company to extensive liability.

(h) Securities investments

There are risks associated with any securities investment and the prices at which the Shares trade may fluctuate in response to a number of factors.

Furthermore, the stock market, and in particular the market for mining and exploration companies, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of such companies. There can be no guarantee that these trading prices will be

sustained. These factors may materially affect the market price of the Shares regardless of the Company's operational performance.

(i) Share market conditions

Share market conditions may affect the value of Shares regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- general economic outlook;
- interest rates and inflation rates;
- changes in investor sentiment toward particular market sectors;
- global media reports;
- the demand for, and supply of, capital; and
- other external factors whether real or perceived by the market.

The market price of the Shares may fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource stocks in particular.

Neither the Company nor the Directors warrant the future performance of the Company, or any return on an investment in the Company.

(j) Economic Risk

Changes in the general economic climate in which the Company operates may adversely affect the financial performance of the Company. Factors that may contribute to that general economic climate include the level of direct and indirect competition against the Company, industrial disruption, the rate of growth of gross domestic product in Australia, or any other country in which the Company may operate interest rates and the rate of inflation.

(k) Changes in Government Policies and Legislation

Any material adverse changes in government policies or legislation of Australia or any other country where the Company may acquire economic interests may affect the viability and profitability of the Company.

4.4 Investment Speculative

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company.

The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the New Shares offered under this Offer Document.

Therefore, the New Shares to be issued pursuant to this Offer Document carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those securities. Potential investors should consider that the investment in the Company is speculative and should consult their professional adviser before deciding whether to apply for New Shares pursuant to this Offer Document.

5.2 Nature of this Offer Document
