

HILL END GOLD LIMITED

ACN 072 692 365

Gold plant startup

27 February 2008

ASX Code : HEG, HEGO

The gold recovery plant for the Reward Gold Mine at Hill End has commenced producing gravity gold and gold-in-concentrate.

The plant commissioning to full operation is proceeding satisfactorily and work remaining to be done includes a number of adjustments to improve crushing and material transfer, the commissioning of the goldroom concentrating table and furnace and to settle into a steady operating mode.

The plant is to initially process approximately 300 tonnes of stockpiled development material of various grades and further underground material will be mined from the vein sets in the Patriarch / Cornelian areas.
