Hill End gold plant construction nears completion

23 January 2008

ASX Code : HEG, HEGO

---

Hill End Gold Limited is pleased to announce that the construction of the gravity recovery gold plant for the Reward Gold Mine at Hill End is rapidly approaching completion.

All equipment for the plant and gold room is in place and structural steel work and electrical installation is almost complete. Commissioning of the plant PLC computer system, which controls the plant operations, is scheduled for next week and full commissioning by mid February with the processing of stockpiled material of various grades, which was produced during the Reward development phase.

Processing of underground material will continue to increase over coming months as new areas are opened up.
